since
1978

1978

The journey of Erses Esans & Ambalaj, a success story that started in 1978, based on family friendship.

1999

Pioneering Cosmetics Industry

Ersa has introduced "açık parfüm", a new term for the industry.

2005

A Great Collaboration

Ersa made an agreement with the TechnicoFlor Esans factory located in Marseille, France, and took on the role of 'privileged distributor' in the Turkish region's essence market.

2007

First Export

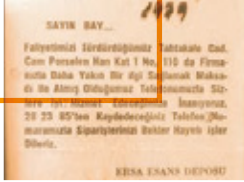

The first export was made to Romania as an added value brought by the expansion of the management team.

1984

A New Initiative For Erses

Ersa, known as the cologne essence provider, started glass packaging manufacturing in domestic factories by creating its own molds in 1984.

1997

New Location

With the increase in sales volume and product diversity, a larger area was needed.

2002

First Packaging Import

50ml Oval Perfume Bottle was imported from Saint Gobain in France.

2010

Resounding Collaboration: Heinz-glas Distributorship

Ersa did not find its current portfolio sufficient and started to search for new packaging. It signed a distributorship agreement with Heinz-Glas, one of the largest glass packaging manufacturers.

2009

Expansion Of Service Area

Ersa has always correctly identified the needs of the sector. As a result, it added the supply of skin care packaging to its portfolio.

2015

New Facilities

It acquired a larger office and a larger warehouse in order to provide the best service to its customers and to improve the working environment conditions of its employees.

2019

WAREHOUSE

5000m2
As Erses Esans ve Ambalaj, in order to offer a wider range of products and respond to customer demands more quickly, we have increased our current capacity and moved to a larger and more modern warehouse area.

The Journey of Ersa Fragrance & Packaging, a success story that started in 1978, based on family friendship. The steps of this journey were taken in an 11m2 shop in Eminönü, when Erol Cibili and Semoel Mizrahi came together in the light of trust, loyalty and ethical values, which are the common building blocks of friendship between them.

Ersa, known as the cologne essence provider, started glass packaging manufacturing in domestic factories by creating its own molds in 1984. Ersa, which made its first packaging import after this date, has embarked on commercial projects that will provide added value.

With the collaboration with Heinz-Glas, it has proven that it wants to provide continuity and offer maximum quality to its customers.

In the following years, it made an agreement with the Technico Flor Fragrance factory located in Marseille, France, and took on the role of 'privileged distributor' in the Turkish region's essence market.

Ersa Fragrance & Packaging, which prioritizes the satisfaction of its employees in order to achieve its goals, moved from a 11m2 store to its 1500m2 closed area office on the Anatolian Side of Istanbul in 2015, where it continues to provide service to its customers today. At the same time, Ersa shows maximum sensitivity to store the packages it imports in suitable conditions and to deliver them to its customers within the requested periods. Today, it has a warehouse area of 3000 m2 located on the European side.

This journey, which started with Mr. Sami and Mr. Erol, continues to serve its customers with 35 people today, in its 45th year.
